Prices on Dutch Bulbs are higher this year. This is because the Holland Government has taken over the Bulb industry attempting to stabilize prices. There will be fewer bulbs brought into the country this year than ever before. Therefore, it is imperative you order early.

We import our bulbs from a most reliable grower, who digs and packs for us bulbs of the higher quality.

About the Future

The present indications are that shortages will develop during the year on many varieties of nursery stock. Prices for nearly all kinds of stock are low. If the Federal Government program to peg prices of agricultural products and devalue the dollar continues, growers will be forced to advance prices for Spring or else suffer greater losses than they have during the past few years.

The prices published in this list are subject to change without notice and are made only for immediate acceptance.

Grade counts will be given in our Bulletin No. 1 which will be issued about February 1, 1934.

You will observe by checking our list carefully that we are offering one of the most complete lines of general nursery stock in America.
